

Take Your Pick!

Picking the right **pharmacy automation solution is easy.**

11%

of medication errors in hospitals are pharmacy **dispensing errors** related to the wrong drug or strength.¹ Many picking errors **are preventable** if you pick the **right solutions.**

60%

of medium/large hospitals use carousel technology.²

They may look sharp, but pharmacy carousels **aren't new.**

In fact, the first carousel was introduced in the 1970s.

BoxPicker®

Automated Pharmacy Storage System was introduced in 2003, replacing outdated carousel technology and **revolutionizing pharmacy storage and picking.**

HELLO

LET US INTRODUCE YOU TO

BoxPicker

Safety First

BoxPicker limits access to only one bin at a time—**eliminating** the opportunity for picking errors.

Staff safety is also a top priority. Only **BoxPicker** provides **zero exposure** to moving parts.

Facility Friendly

Reinforce your floors? Not with BoxPicker thanks to uniform floor loading.
Do your ceilings hang low? BoxPicker is available in 8 or 10 foot heights.

Not enough closet space?

As your pharmacy grows, **inventory increases** and so should your storage. With BoxPicker, you can **add modules** as needed.

You can also **add extra operator stations**, on the front or back and even in an ante room.

Is this box taken?

Storage boxes are **never reserved** or sitting idle waiting for a refill.

Once a box is emptied, it is **reassigned** to the next item that needs to be loaded.

Wait, where is that again?

Figuring out what medications to store and where **shouldn't be complicated.**

BoxPicker does it for you—moving inventory to storage and dispensing at the touch of a finger.

Is it Cold in Here?

BoxPicker provides **refrigeration options** – add a single refrigerated module or refrigerate the entire system.

Lock them up!

Store narcotics and other high-diversion medications in the **secure BoxPicker Narcotic Vault.**

Order Up

No need to put on your walking shoes to prep for picking. Medications are **brought right to you** at a secure operator station.

You won't be waiting either. BoxPicker picks ahead of the user at a rate of **3 to 1** over standard carousels.

DO MORE

with less

With BoxPicker, **multiple activities** can take place **simultaneously.** Load from one station, pick from another.
